

– Mobile Fire Training Unit –

In 2000, SOMATI started to offer mobile fire trainings and since then we've grown to become market leader in Belgium.

We developed and built our mobile Fire Training Units ourselves; the concept is multifunctional for all fire extinguishing means and target groups, cost-saving for the customer and environmentally friendly.

OBJECTIVE

To learn employees how to act rapidly and efficiently upon a starting fire and to make them familiar with portable fire extinguishers.

TARGET AUDIENCE

- Employees who according to the Law on the Protection at Work (Codex, Chapter III article 17) must be informed on the fire extinguishers installed there.*
- Intervention teams according to ARAB article 52.10.6.*
- Employers and their employees who according to article 52.1 must take the necessary measures to fight every beginning of a fire rapidly and effectively.*

PROTECTING TODAY'S FUTURE

- Mobile Fire Training -

C

Content

Theory

(ignition temperature – oxygen – inflammable substance)

- * What is fire?
- * Which are the different types of fire?
- * Which are the different extinguishing means?
- * How does a fire evolve?
- * Signalling and alarm signals

Video "First intervention equipment"
