

# Safety lights

- **ELETTRA**

- Luminaires can be supplied as permanent and non-permanent versions
- IP40
- Made according to the CE-standard EN 60598-2-22
- Supply 230V 50 Hz
- Charged in 12h
- NiCd-battery suitable for high temperatures

- **TOP 4**

- Emergency floodlight with hermetically closed, rechargeable batteries with two lights; a powerful xenon lamp of 6W and an incandescent lamp of 1.5W
- Autonomous for 4h (main light) and 12h (auxiliary light)
- Protection type IP40, double insulation
- Synthetic housing
- Supply 220/230V - 50/60 Hz
- Charged in 24h
- Operating temperature: -10° +40° C

- **RAPIDA**

- Easy to mount against wall or ceiling through a quick-coupling system
- Luminaires can be supplied as permanent and non-permanent versions
- IP40
- Housing in self-extinguishing synthetic material (UL94)
- Made according to the CE-standard EN 60598-2-22
- Luminaires with "on-hold position" according to CEI 60598-2-22
- Supply 230V 50 Hz
- Charged in 12h
- NiCd-battery suitable for high temperatures
